

Gas Cylinder Storage Cabinet

Introduction

Safoo indoor Gas Cylinder Cabinet is based on the product concept of compliance, environment, health, and safety. It solves the problem of mixed storage during the storage of compressed and liquefied gases. It is a safe gas cylinder storage cabinet for storing various flammable, explosive, and hazardous gases(such as methane, acetylene, hydrogen, oxygen, inert gas, etc.).

Features

- ◎ Cabinet body: Made of $\geq 1.2\text{mm}$ high-quality cold-rolled steel plate;
- ◎ Door panel: Made of $\geq 1.0\text{mm}$ high-quality double-layer cold-rolled steel plate;
- ◎ Movable fixing device: 304 stainless steel chain fixing;
- ◎ Pedal: Stainless steel printed pedal;
- ◎ Handle: 304 stainless steel handle;
- ◎ Gas detection alarm device: Optional combustible gas detection alarm, special gas detection alarm;
- ◎ Automatic exhaust system: optional.
